The image features three large, overlapping green circles arranged horizontally. The central circle is fully visible and contains text. The circles on the left and right are partially cut off by the frame. A subtle vertical gradient is applied to the circles, transitioning from a lighter green on the left to a darker green on the right.

01

Problem

Problem

Inefficient livestock feed industry causing low profit rate, excess carbon emissions and inefficient feed management.

02

Solution

Farm feed-bin measuring device : **Feed Manager FM-04**

Real time measuring feed quantity, consumption pattern, temperature, humidity etc. data

10 minutes self-installation

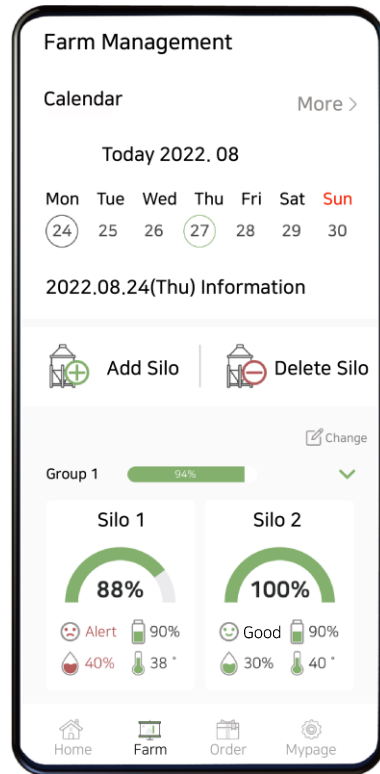

LTE telecommunication

Data Collection

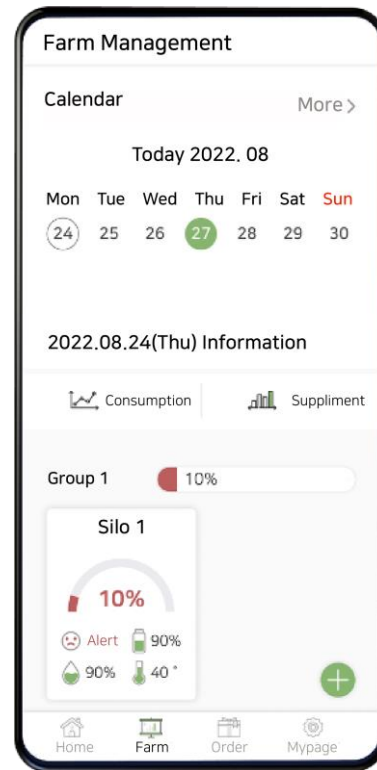

Real-time feed management App: Myfeed

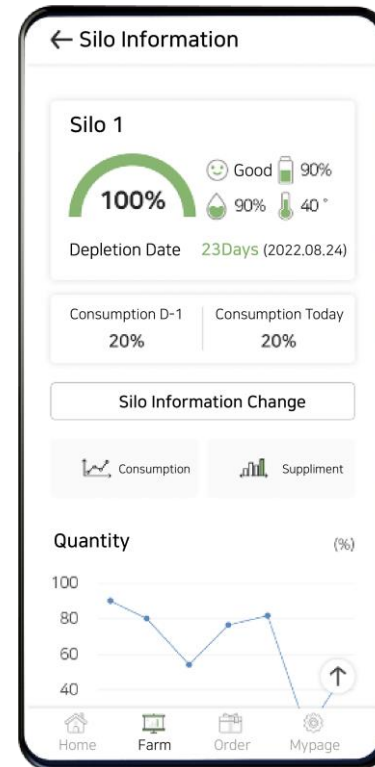

Farmers can monitor feed, receive feed consumption alarms to optimize feed ordering through the 'Myfeed' app

Farm management page

Feed Alarm

Daily Feed Consumption

Feed quantity monitoring

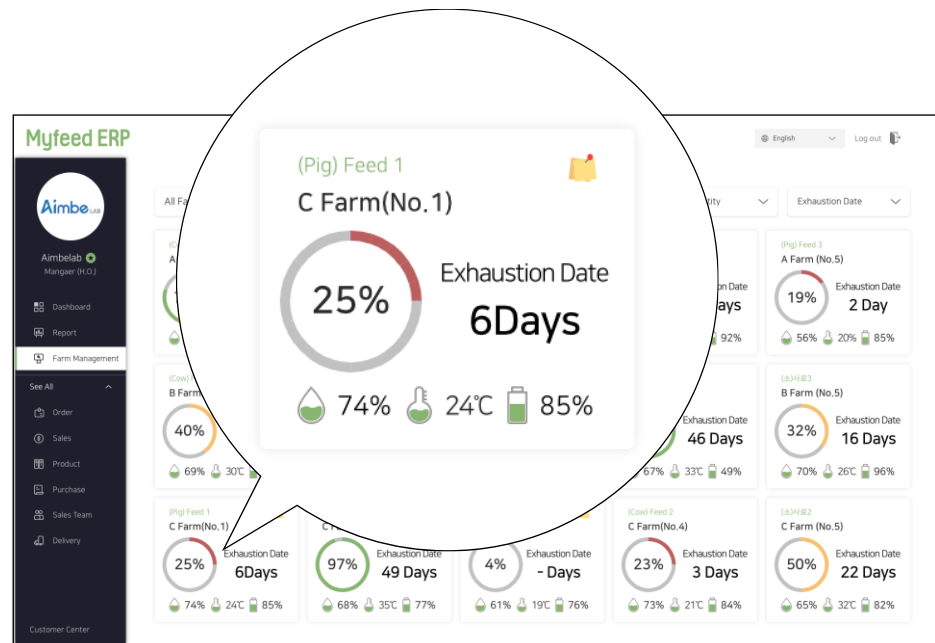

Feed condition monitoring

Feed consumption &
prediction alarm

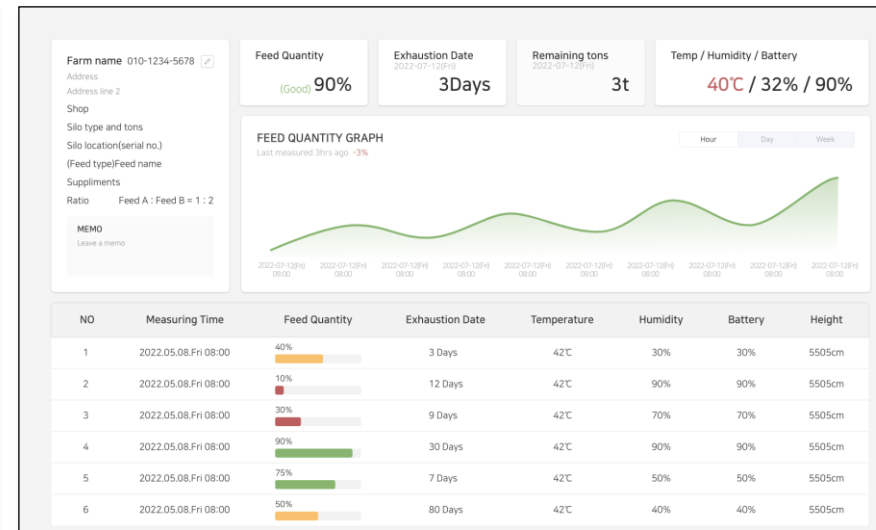

Feed ordering

Monitor and deliver feed: WEB

Devise feed delivery plans by monitoring client farms' feed situations. Optimize logistics, inventory, sales and feed deliveries.

Monitoring client farms' feed

Individual silo monitoring page

Monitor client farms' feed

Devise feed delivery plan

Logistics, Inventory management

Monitor & manage deliveries

Value Proposition

Through Aimbelab solution we reduce costs and boost profit and efficiency for farmers and companies.

B2B

Company

- Feed delivery cost up to **30% reduced**
- CO2 emission **reduction**
- Client farmers **lock in**

B2B

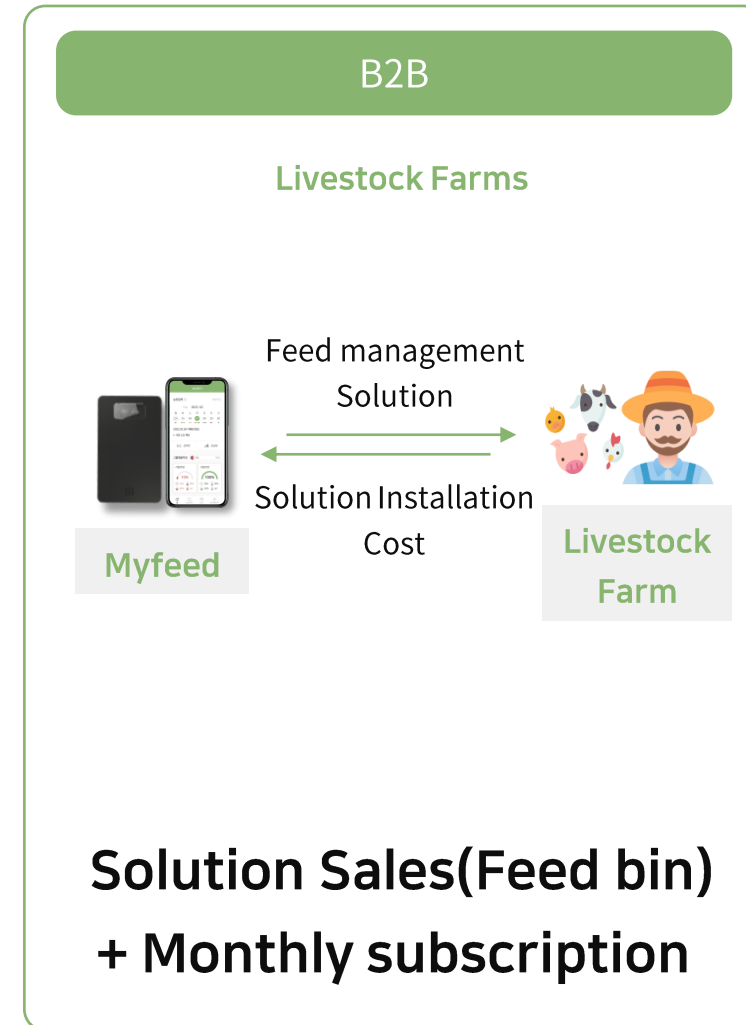

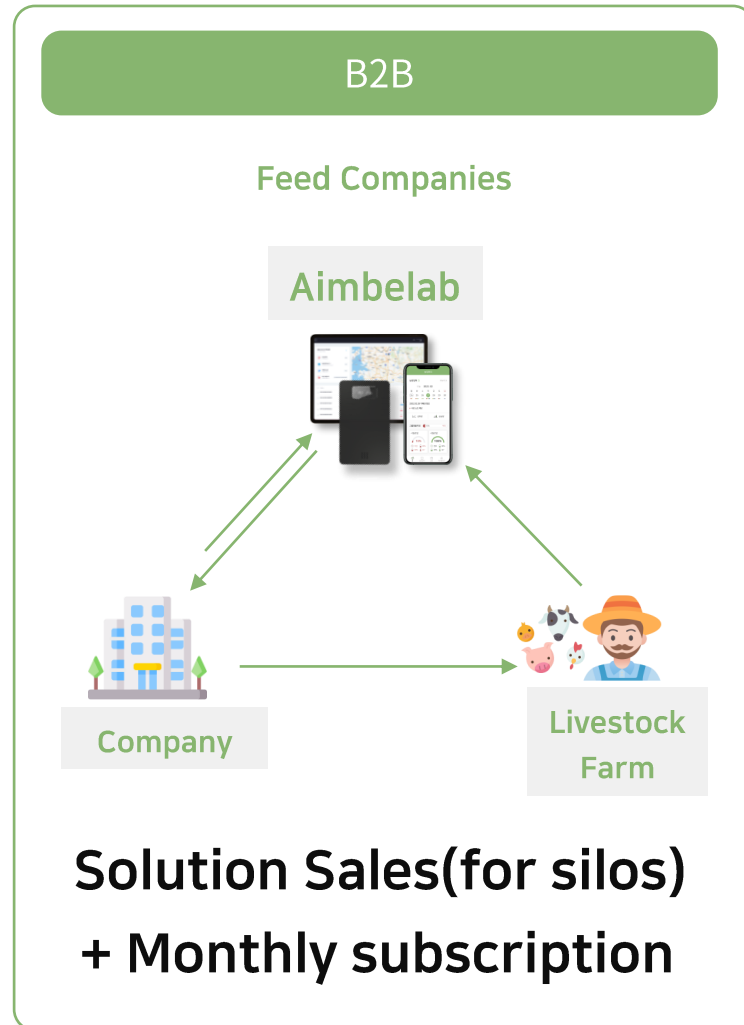

Farms

- **Optimal low-cost** feed monitoring
- Prevent Feed Contamination
- Human labor **reduced**

Revenue Model

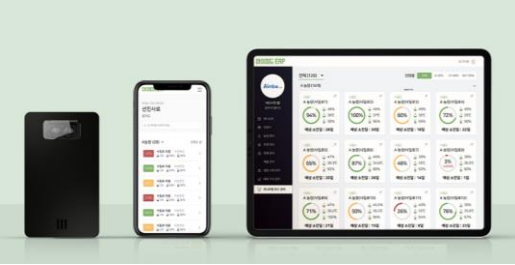

Revenue is gained through product sales and monthly subscription

Competition

Costs 1/4th to competing products, easy installation, providing data solutions based on 400,000 cases of feed data

Aimbelab

Price

75% reasonable

Installation

10 Mins self-installable

Data Utilization

400,000 Feed Data

Competition

Bracket + Solar Panel
+ Gateway etc.

Loadcell + Reinstall Silos

Over \$2,000 on average (U.S.)

Unsure

Foreign Expansion

Founded in 2020, Aimbelab has established markets domestically and abroad.

1 Proof of Concept in several Countries : Feed deliveries and greenhouse emission reduction

2 POC in Europe and North American market MOU with GLW Feeds U.K. (2020 Nov)

3 Extending to China and S.E. Asian Markets

- Awarded as a company with excellence in export by EPIS Korea(2021. Nov)
- Vietnam Embassy company with excellence in export (2021. May)
- Agriproduct Export Supported Company (2021. May)

Foreign Expansion

Founded in 2020, Aimbelab has established markets domestically and abroad.

4 Activities for Foreign Expansion(21. Oct~today) Exhibitions

- Dubai Korean Expo(2022)
- SWITCH(2022) TOP 50 amongst 3600 companies
- SLUSH(2022) Global Media Awards TOP 3
- Uruguay IDB Business Summit(2022)
- CES (2023)

Foreign Sales

- Sunjin Philippines Export(22. Oct)
- Korea Livestock Data Malaysia farm export(22. Nov)

Partners and Support

- Born2Global(Ministry of Science) Member (22. Aug)
- Techstars AC acceleration (22. May)
- Global Startup School(Ministry of SMEs) (22. April)
- Gyeonggi Province Foreign Investment Support Company (22. Apr)
